SCIP Declaration

Substances of Concern in articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD)

To our Customers,

We understand the importance of complying with European Chemical Agency (ECHA) requirements. As such, we want to emphasize to you that Union Foam S.p.A. is continuously reviewing and gathering all essential information by communicating regularly on changes in the status of their articles.

The ECHA, through its updated Waste Framework Directive, is building a database on articles and complex objects (products) that contain substances of very high concern (SVHCs). The goals of this directive are waste prevention, reduction in hazardous materials and products, and support of circularity in the economy.

Union Foam S.p.A. actively monitors provisions of ECHA requirements to declare Substances of Concern in Products (SCIP) greater than 0.1% for articles that we distribute inside the EU market. In addition, we will provide the necessary information in a timely manner for proper management of environmental compliance in the supply chain.

By this declaration, we confirm that none of the articles produced by Union Foam S.p.A. contain SVHC in a concentration of more than 0,1%.

For more information on the SCIP database, visit <https://echa.europa.eu/scip-database>.
